✆   Review:

➢ Diagrams are designed in such a way that it should depict the appropriate information such as flow of the system, Roles of the Actors, State Transformation, activities of the modules.

➢ Directions shown in the diagrams must be in proper flow.

➢ Activity diagram reviewed.

➢ State chart diagram reviewed.

➢ Use case diagram reviewed.

➢ Sequence diagram reviewed.

✎ Remarks:

- ➢ Class diagram is not there because node.js is used and is it not the class bound language.
- ➢ Data Flow Diagram is not there because it represents the flow of the data in the system and sequence diagram also represents flow of the messages passes to the system.
